

ADJUSTABLE TEMPERATURE SENSOR

Indoor Sensor

The adjustable temperature sensor can be placed up to 2000 feet away from the **tattletale™**. The sensor is designed to trigger an alarm if the ambient temperature rises above your set high temperature or below your set low temperature. The unit has a high range of 299° F and a low range of -58° F. In addition, the sensor can be programmed to a supervised 24-hour zone to notify the central station whether or not unit is armed. The internal backup battery that is included will typically last for 12 hours.

**Protect Anything.
Anytime.
Anywhere.**
